EU Citizen | Cork, Ireland | gl.candido77@gmail.com | linkedin.com/in/guilhermelcandido | Phone: +353 083 078 0546 | Portfolio: glcandido.github.io

## PROFESSIONAL SUMMARY

Analytics and BI professional specializing in process automation and reporting workflows. Proven ability to transform disorganised operational data into actionable insights using SQL, Power BI and Google Apps Script. Track record of building automated systems that reduce manual workload by 80% and recover thousands of euros in annual operational capacity.

## CORE SKILLS

- Data & BI: SQL, Power BI, DAX, Excel (Advanced), Google Sheets, Power Query
- Automation: Google Apps Script, Advanced Formulas, ETL Basics, Workflow Optimization
- Analytics: KPI Tracking, Data Storytelling, Data Cleaning, Process Automation

## PROFESSIONAL EXPERIENCE

### Data & Process Analyst | TravelMaster.ie | Cork, Ireland | Jun 2025 – Present

- Architected a Google Sheets/Apps Script automation pipeline for route breakdowns, replacing a manual event-update workflow and reducing monthly processing from ~9 hours to <2 hours (~80% reduction).
- During peak season (30+ events), the system prevents 45–75 hours/month of manual rework, recovering €750–€1,200/month (€3,200–€4,600 annualised) in operational capacity with only 5–10 mins/day oversight.
- Built structured dashboards tracking booking, scheduling, and inventory KPIs, improving visibility for resource allocation while maintaining data integrity across departments.

### Assistant Manager | Gino's Gelato | Cork, Ireland | Nov 2021 – Jun 2025

- Analysed daily sales and stock movement to inform inventory replenishment, managing ordering cycles based on sales velocity to reduce waste during seasonal peaks.
- Tracked KPIs (stock turnover, labour efficiency) and restructured task delegation, reducing downtime and measurably improving team throughput.

### IT Technician | Analizo - Sistemas de Gestão em Saúde | Santos, Brazil | Jul 2021 – Oct 2021

- Provided technical support for healthcare management systems and wrote MySQL queries to extract and structure operational data for internal reporting.

### Full Stack Developer | Objetivo Baixada Santista | Santos, Brazil | Oct 2017 – Dec 2019

- Designed MySQL relational databases and built data integration pipelines (APIs) for custom web applications, ensuring data quality and system integration.

## PROJECTS

### Operational Performance Dashboard | Google Sheets

- Built an interactive dashboard tracking process completion and error KPIs, cleaning raw data in Excel to enable dynamic filtering and eliminating manual weekly review compilation.

### Olist E-commerce Growth & Retention Analytics | SQL, Tableau

- End-to-end analysis of revenue (GMV proxy), orders, customer growth, repeat share, and category/product performance. Includes interactive dashboards and documented SQL pipeline.

### Coffee Shop Sales Analysis | SQL, MySQL, Power BI, DAX

- End-to-end analysis of ~149K transaction records across three stores, covering store and product performance, trends, and holidays; published an interactive Power BI report and documented GitHub case study.

## EDUCATION & CERTIFICATIONS

Graduation in Data Analysis & Systems Development | UNIMONTE, Brazil | 2016 – 2018

Certifications: Excel for Data Analytics (Analyst Builder, 2025) | MySQL for Data Analytics (2025)
